

PERSONAL INFORMATION

Nationality: Zimbabwean
National ID: 63-2329813 N 34
Date of Birth: 12 / 06 / 1996
Email: lewismujana@gmail.com
Mobile: +263 787 885 180
Address: 213 Hay Road, Bindura

CAREER SUMMARY

Civil Engineer with six (6) years of professional experience in civil and structural engineering projects. Holds a BSc (Hons) in Civil Engineering and a Certificate in Construction Project Management from the University of Cape Town, South Africa.

Experienced in construction supervision, quality control, contract administration, design and compliance of public infrastructure projects including reinforced concrete structures, buildings, dams, drainage works. Committed to supporting the Ministry of Local Government and Public works in delivering safe, durable, cost-effective, and regulation-compliant infrastructure that enhances service delivery and community development in Zimbabwe.

UNIVERSITY OF CAPE TOWN, SOUTH AFRICA |
| 2019 | BSc IN CIVIL ENGINEERING DEGREE (Hons)
UNIVERSITY OF CAPE TOWN, SOUTH AFRICA |

EMPLOYMENT HISTORY

JANUARY 2025 - OCTOBER 2025

TECHNICAL ENGINEER

Vhecmore Enterprises, Zimbabwe

Responsibilities:

- Monitoring and assessing the structural integrity of the Tailings Storage Facility (TSF) through visual inspections and instrumentation data analysis such as beach length, freeboard, standpipe piezometer readings, underground flow rates and slurry densities.
 - Conducting risk assessments and ensuring compliance with local, national and international tailings management regulations in particular the Global Industry Standard on Tailings Management (GISTM) and best practices.
 - Utilizing geotechnical, hydrological, and other monitoring tools to track TSF performance and detect early warning signs of instability.
 - Preparing detailed technical reports, including recommendations for corrective actions when necessary.
 - Assisting in developing maintenance plans for TSF, pipelines and related infrastructure.
 - Setting out deposition control pegs and ensuring that the slurry deposition thickness is in accordance with the specified technical specifications.
-

- Responsible for the adoption and adherence to the Operational Maintenance and Surveillance (OMS) Manual by the site team.
- Coordinating with other contractors, Engineer of Record (EoR), and internal teams during construction or upgrade activities.
- Contributing to environmental stewardship by optimizing tailings management processes to minimize impact on the surrounding ecosystem.

ACHIEVEMENTS:

- Monitored and managed the Anglo-American Unki Platinum mine TSF operation depositing 40,000-50,000 tonnes of slurry per week with zero safety incidents.

MARCH 2024 - DECEMBER 2024

CIVIL ENGINEER

Servinet Consulting Engineers, South Africa

Responsibilities:

- Carrying out Contract Administration during the Construction of a 4 km Clear Vu Fence at the South African National Biodiversity Institute (SANBI) Free State National Botanical Garden.
- Performing the role of the Quality Control and Quality Assurance Engineer in ensuring that construction is carried out according to specification.
- Responsible for processing and signing off contractor claims.
- Adjudicating sub-contractors to perform specialist work.
- Assisting in the preparation of tender documents.

ACHIEVEMENTS:

- Successfully carried out the Contract Administration and construction for a 4 km Clear Vu Fence at the Free State National Botanical Garden.

NOVEMBER 2022 - FEBRUARY 2024

PROJECT ENGINEER

CONSTRUCTAXIS Consulting Engineers, Zimbabwe

Responsibilities:

- Developing project briefs and definition of the scope of services and work required for the design and construction of civil engineering structures such as reinforced concrete structures, steel portal frames, masonry and earth fill dams.
- Using AutoCAD and Prokon Structural analysis in preparing initial concept designs and design development drawings including draft technical sketches and specifications.
- Using Microsoft Excel in the preparation of schedules of predicted cash flow, cost estimates of proposed variations and life cycle costs as required by the different project stakeholders.
- Familiar with the South African National Standards (SANS) and the British Standard Codes (BS) in carrying out structural analysis and design.
- Managing, interpreting construction drawings and ensuring that the structures are constructed as per design & quality requirements.
- Assisting with procurement of materials required on site, liaising with suppliers and sub-contractors to ensure the timeous delivery of materials and completion of projects.

- Carrying out performance costing to assess the profitability of construction projects.
- Preparing project costing reports to assist directors and senior management with decision making.

ACHIEVEMENTS:

- Completed the construction of a two-storey Office Block special foundation with a floor area of 250 m².
- Completed the design of two three-storey Magoche Hostels each measuring 75m x 25 m.
- Completed the design of a steel portal frame with a floor area of 20 m x 10 m
- Carried out the geotechnical investigations and foundation design for a supermarket measuring 30 m x 8 m.

OCTOBER 2020 - OCTOBER 2022

PROJECT ENGINEER

J.R Goddard Contracting, Zimbabwe

Responsibilities:

- Managing and supervising of civil and construction work to ensure that all work is completed to the necessary engineering plans and specifications, legal requirements and quality standards.
- Development of method statements that achieve the expected quality specifications while ensuring the efficient utilization of plant, equipment, personnel and materials.
- Ensuring that work carried out meets the health and safety requirements through instilling a sense of safety to the different team members through carrying out pre-task assessment and risk assessments to ensure that work is done safely.
- Participating in material sampling and testing, including selection and requisition of material that meets the design specifications.
- Carrying out concrete pre-inspections on concrete works to ensure that shuttering and dimensions are accurate before any casting of concrete commences.
- Reviewing of technical drawings and suggesting technical, design and engineering changes to improve performance and efficiency.
- Development of project schedules and forecasts, creation of progress reports and communicating progress and technical issues to different stakeholders during meeting and other different channels.
- Assisting in the operations of facilities and equipment for transporting fill material from borrow areas, excavations and stockpiles to the final point of placement.
- Managing the quality control file for the project and ensuring that it is kept up to date.

ACHIEVEMENTS:

- Completed the construction of a concrete lined Anglo American Unki Mine pollution control dam with a concrete volume of 2000 m³ including reinforced columns and bases.
 - Completed the Construction of the Anglo American Unki Mine Tailings Dam phase 7 wall raise.
-

- Complete the construction of Gweru Radar casting reinforced concrete inductotherm furnace.
- Completed the Construction of Magar Village Dam 1 to 3.

FEBRUARY 2020 - SEPTEMBER 2020

ASSISTANT RESIDENT ENGINEER
FIJ CONSULTING ENGINEERS, South Africa

Responsibilities:

- Assisting in monitoring and ensuring that the work carried out by sub-contractors meets the design specifications and quality control standards.
- Ensuring the safety of the work carried out by actively participating in tasks such as development of traffic management plans and liaising with different authorities to acquire permits to work.
- Carrying out administrative tasks such as compiling progress reports, minutes in progress meetings and properly filing and managing the quality control file
- Working with AutoCAD civil 3D and 2D in checking road alignments and setting out coordinates.

PROFESSIONAL MEMBERSHIP

JANUARY 2025 - PRESENT **REGISTRATION WITH ZIMBABWE INSTITUTION OF ENGINEERS (ZIE) IN PROGRESS**

JANUARY 2020 - PRESENT **CANDIDATE ENGINEER - ENGINEERING COUNCIL OF SOUTH AFRICA**

TECHNICAL SKILLS AND PERSONAL ATTRIBUTES

COMPUTING	▪ Competent in using Microsoft Office packages such as Microsoft Word, Microsoft Excel, Microsoft PowerPoint and Microsoft Project. ▪ Intermediate level in AutoCAD, AutoCAD Civil 3D and Prokon. ▪ Intermediate level in using Python Programming language.
OTHER SKILLS	▪ Competent in interpreting construction drawings ▪ Construction Supervision, Site Management and Estimating.
KEY PERSONAL ATTRIBUTES	▪ Strong verbal and written communication skills, can adapt to diverse team structures, lateral thinker and team player.

ACTIVITIES AND SOCIAL WORK

FEBRUARY 2018 - PRESENT

STUDENT MENTOR

Africa Careers City (ACC)

Started a Career Guidance Club (ACC) to inform high school students about Civil Engineering and how best they can prepare themselves for University.

AUGUST 2018 - AUGUST 2019

STUDENT TUTOR

University of Cape Town

Visited disadvantaged students to offer extra teaching lessons in mathematics and science.
