CAREER SUMMARY

Civil Engineer with over six (6+) years of professional experience in civil and structural engineering projects. Holds a BSc (Hons) in Civil Engineering and a Certificate in Construction Management; both qualifications awarded by the University of Cape Town, South Africa.

Result-driven engineer with expertise in project management, technical problem-solving and sustainability. Proven track record in delivering infrastructure projects on time and budget. Skilled in stakeholder engagement, risk management, and team leadership. Eager to apply skills and grow in design and engineering roles.

KEY QUALIFICATIONS

2020 **CERTIFICATE IN CONSTRUCTION MANAGEMENT**
UNIVERSITY OF CAPE TOWN, SOUTH AFRICA

2019 **BSc IN CIVIL ENGINEERING DEGREE (Hons)**
UNIVERSITY OF CAPE TOWN, SOUTH AFRICA

KEY COMPETENCIES

ENGINEERING AND DESIGN:

- Fundamental understanding of civil and structural design including reinforced concrete structures, steel structures, masonry and earthfill dams.
- Tailing Storage Facility (TSF) Monitoring and structural integrity assessment.
- Geotechnical and hydrological analysis.
- Familiar with using South African National Standards (SANS) and British Standards (BS) in carrying out design.

PROJECT AND CONSTRUCTION MANAGEMENT:

- Project planning, scheduling and forecasting.
- Construction supervision and site management.
- Construction contract administration.
- Construction method statement development and quality assurance.
- Stakeholder management and client coordination.
- Multi-disciplinary team leadership.

TECHNICAL TOOLS AND SOFTWARE:

- Familiar with using AutoCAD 2D, Civil 3D and Prokon Structural Analysis software.
- Microsoft Excel for cost estimation, lifecycle costing and cash flow scheduling.
- Microsoft Project for project scheduling and resource management.

RISK, COMPLIANCE AND REPORTING:

- Risk assessment and mitigation.
- Environmental compliance including EMA regulations.

- Health and Safety management.
- Technical reporting and documentation.
- Audit compliance and performance monitoring.

EMPLOYMENT HISTORY

JANUARY 2025 - OCTOBER 2025

TECHNICAL ENGINEER

Vhecmore Enterprises, Zimbabwe

Vhecmore Enterprises (VE) is a Zimbabwean based Tailings Management Company based in Gweru. VE manages the Tailings Storage Facility for the Anglo-American Unki Platinum Mine located in Shurugwi, Zimbabwe. Held the position of a Technical Engineer.

RESPONSIBILITIES:

- Monitoring and assessing the structural integrity of the Tailings Storage Facility (TSF) through visual inspections and instrumentation data analysis. Some of the data analyzed included beach length, beach profile, freeboard, barge pumps depth standpipe piezometer readings, underground flow rates and slurry densities.
- Conducting risk assessments and ensured that the operations of the TSF did not violate laws stipulated by the Environmental Management Agent (EMA) in instances when water from the Return Water Dam (RWD) spilled in the environment.
- Utilizing geotechnical, hydrological, and other monitoring tools to track TSF performance and detect early warning signs of instability.
- Preparing detailed technical reports, including recommendations for corrective actions when necessary and presenting these findings in a weekly meeting with key stakeholders such as the engineering manager and the concentrator manager.
- Assisting in developing maintenance plans for TSF, pipelines and related infrastructure such as the Return Water Dam.
- Setting out deposition control pegs and ensuring that the slurry deposition layer thickness is in accordance with the specified technical specifications.
- Responsible for the adoption and adherence to the Operational Maintenance and Surveillance (OMS) Manual.
- Coordinating with other contractors working on the TSF, Engineer of Record (EoR), and internal teams during construction or upgrade activities.
- Participating in the development of a methodology for the successful implementation of the Cycloning trial project; a pilot project which was intended to use tailings material to raise the embankment instead of earthfill material.

ACHIEVEMENTS:

- Consistently met the audit standards for the monthly audits carried out by Unki Platinum mines, the quarterly audits carried out by the EoR, the annual dam safety audits.

MARCH 2024 - DECEMBER 2024

PROJECT MANAGER

Servinet Consulting Engineers, South Africa

Servinet Consulting Engineers is a South-African based Engineering firm offering multi-disciplinary civil engineering services. Held the position of project manager responsible for managing the project assigned to me.

RESPONSIBILITIES:

- Implementation of the General condition of contract for construction works (GCC) in the projects assigned to me.
- Chairing progress meetings with the key project stakeholders and preparing meeting minutes.
- Carrying out routine inspections to ensure that the design intent was being adhered to during construction.
- Processing and signing off contractor claims.
- Adjudicating sub-contractors to perform specialist work.
- Issuing of practical completion certificates and certificates of completion upon project finish.
- Ensuring that all project information such as appointment letters, progress meetings, contractors reports, contractual communications and other relevant documents are kept up to date.
- Preparing the final close out report for the project and submitting it to the Client.

ACHIEVEMENTS:

- Successfully completed the role of Client representative for the South African National Biodiversity Institute (SANBI) during the construction of a 5 km Clear View fence around the Free State National Botanical Garden. The project was completed in alignment with contract terms, achieving stakeholder satisfaction.
- Successfully completed the role of Client representative for the Emarkhazeni Local Municipality during the construction of a 200 m paved road in Mpumalanga. Demonstrated engineering professionalism in project execution meeting contractual and technical requirements.

NOVEMBER 2022 - FEBRUARY 2024

Structural Design Engineer

CONSTRUCTAXIS Consulting Engineers, Zimbabwe

Constructaxis Consulting Engineers is a Civil Engineering consulting firm that I registered in Zimbabwe in order to award myself an opportunity to develop design competencies. During my time at Constructaxis, I shadowed a more experienced structural engineer who oversaw my work and offered mentorship and guidance.

RESPONSIBILITIES:

- Developing project briefs and definition of the scope of services and work required for the design and construction of civil engineering structures such as reinforced concrete structures, steel portal frames, masonry and earth fill dams.
- Using AutoCAD and Prokon Structural analysis in preparing initial concept designs and design development drawings including draft technical sketches and specifications.
- Using Microsoft Excel in the preparation of schedules of predicted cash flow, cost estimates of proposed variations and life cycle costs as required by the different project stakeholders.
- Using the South African National Standards (SANS) and the British Standard Codes (BS) in carrying out structural analysis and design.
- Managing, interpreting construction drawings and ensuring that the structures are constructed as per design and quality requirements.

- Assisting with procurement of materials required on site, liaising with suppliers and sub-contractors to ensure the timeous delivery of materials and completion of projects.
- Carrying out performance costing to assess the profitability of construction projects.
- Preparing project costing reports to assist directors and senior management with decision making.

ACHIEVEMENTS:

- Designed a three-storey Hostel measuring 75m x 25 m using AutoCAD and Prokon software.
- Designed a steel portal frame with a floor area of 20 m x 10 m using AutoCAD and Prokon software.
- Carried out the Dynamic Cone Penetrometer (DCP) geotechnical investigations test and foundation design for a supermarket measuring 30 m x 8 m.
- Completed the construction of a two-storey Office Block special foundation with a floor area of 250 m².

OCTOBER 2020 - OCTOBER 2022

PROJECT ENGINEER

J.R Goddard Contracting, Zimbabwe

RESPONSIBILITIES:

- Managing and supervising of civil and construction work to ensure that all work is completed to the necessary engineering plans and specifications, legal requirements and quality standards.
- Development of method statements that achieve the expected quality specifications while ensuring the efficient utilization of plant, equipment, personnel and materials.
- Ensuring that work carried out meets the health and safety requirements through instilling a sense of safety to the different team members through carrying out pre-task assessment and risk assessments to ensure that work is done safely.
- Participating in material sampling and testing, including selection and requisition of material that meets the design specifications.
- Carrying out concrete pre-inspections on concrete works to ensure that shuttering and dimensions are accurate before any casting of concrete commences.
- Reviewing of technical drawings and suggesting technical, design and engineering changes to improve performance and efficiency.
- Development of project schedules and forecasts, creation of progress reports and communicating progress and technical issues to different stakeholders during meeting and other different channels.
- Assisting in the operations of facilities and equipment for transporting fill material from borrow areas, excavations and stockpiles to the final point of placement.
- Managing the quality control file for the project and ensuring that it is kept up to date.

ACHIEVEMENTS:

- Completed the construction of a concrete lined Anglo American Unki Mine pollution control dam with a concrete volume of 2000 m³ including reinforced columns and bases.

- Completed the Construction of the Anglo American Unki Mine Tailings Dam phase 7 wall raise.
- Completed the construction of Gweru Radar casting reinforced concrete inductotherm furnace.
- Completed the Construction of Magar Village Dam 1 to 3.

FEBRUARY 2020 - SEPTEMBER 2020

ASSISTANT RESIDENT ENGINEER
FIJ CONSULTING ENGINEERS, South Africa

RESPONSIBILITIES:

- Assisting in monitoring and ensuring that the work carried out by sub-contractors meets the design specifications and quality control standards.
- Ensuring the safety of the work carried out by actively participating in tasks such as development of traffic management plans and liaising with different authorities to acquire permits to work.
- Carrying out administrative tasks such as compiling progress reports, minutes in progress meetings and properly filing and managing the quality control file
- Working with AutoCAD civil 3D and 2D in checking road alignments and setting out coordinates.

PROFESSIONAL MEMBERSHIP

JANUARY 2020 - PRESENT **Candidate Engineer, Engineering Council of South Africa (ECSA)**

ACTIVITIES AND SOCIAL WORK

FEBRUARY 2018 - PRESENT **STUDENT MENTOR**
Africa Careers City (ACC)

RESPONSIBILITIES:

Started a Career Guidance Club (ACC) to inform high school students about Civil Engineering and how best they can prepare themselves for University.

AUGUST 2018 - AUGUST 2019 **STUDENT TUTOR**
University of Cape Town

RESPONSIBILITIES:

Visited disadvantaged students to offer extra teaching lessons in mathematics and science.
